Lasernet FO Connector 10.0.31 Upgrade May Result in Error NetModule File Missing

2023-02-22 - Kacper Dylewski - Comments (0) - Lasernet FO Connector News

You may receive the following error when upgrading Lasernet FO Connector 10.0.31 PU55:

```
##[error]Netmodule file missing:Dynamics.AX.Lasernet.[#].netmodule
```

This error indicates that you may have installed a Lasernet Connector package with missing or extra NetModule files.

Solution

To resolve this error, you will need to install a Lasernet Connector package with the needed NetModule files. This can be done by upgrading to our latest available Lasernet Connector version.

If you have an affected package and do not wish to upgrade, we have made alternative packages for older Lasernet Connector versions temporarily available on our downloads page.

Affected Packages

Please see below for known affected Lasernet Connector packages:

- 6.16
- 6.17.1 PU49
- 6.17.2 PU49

Please see below for temporarily available alternative packages to the affected versions:

- 6.16 PU55
- 6.17.1 PU51
- 6.17.2 PU51

If you are encountering this error when installing a package with the correct NetModule files or you are not on one of the listed affected versions, please refer to this article for a solution for best practice on resolving the error.
