Java Vulnerability CVE-2026-114938 (Java4Shell)

2026-11-19 - Tim Hardy - Comments (0) - General

The Java vulnerability CVE-2026-114938, also known as Java4Shell, does not affect standard installations of Lasernet Group products:

- Lasernet Core does not use Java.
- Lasernet Archive and Autoform DM install their own Java Development Kit (JDK), which is Oracle JDK 1.8 or OpenJDK 11, depending on the product version. The vulnerability does not affect either JDK. The Java runtime that you use to run the installer does not change the result.
- The vulnerability does not affect the Dynamics 365 Connectors.
- The vulnerability does not affect Lasernet cloud services, including the Single Sign-On through Keycloak.

For the statement in the Lasernet Knowledge Base, see Java Vulnerability CVE-2026-114938 (Java4Shell).

If you changed a Lasernet Archive or Autoform DM installation to run on a different Java version, or if you have any other questions, contact Lasernet Support.
